

Product / Services stories From AAA Sexy Floors Australia

14 MARCH 2007

Colour can excite, inspire, promote, encourage and invigorate people. Mixing the right blend of colour can defuse negative feelings. Can you imagine having one of our designer floors in your reception area, office, restaurant, showroom or home? Architects and Interior Designers recognize the need for floors to be practicable, non slip, hardwearing and environmentally safe. They are also realizing that it doesn't have to be boring.

AAA Sexy Floors can estimate and specify any Commercial, Industrial and Domestic projects within Australia.

TURKISH DELIGHT

Some may remember our Turkish Delight from a few months back. It looks so good we thought we'd show you again.

This gorgeous solid red designer floor looks spectacular with furniture of cool white and rosy red.

Imagine something like this in your place of work, be it; office, showroom, restaurant, retail space, warehouse or maybe your home. One of the advantages of epoxy floors is if you are not keen on red pick a colour that you like, maybe a tranquil green, harbour blue, sunny yellow, white, purple, turquoise... how about a rainbow.

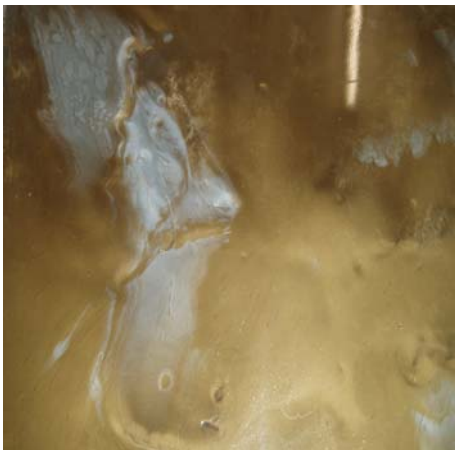

RED ORANGE SWIRL

The other great thing about epoxy is you can change it right before your eyes and mix other colours with it like our red orange swirl.

Orange is one of those colours that can simulate the appetite, but a solid orange floor in a restaurant maybe a bit too much, so mix it with another colour on a white base and you have a seamless floor that is uniquely yours.

If your company has corporate colours why not mix them together, then to finish it off, we can insert your logo onto the floor.

GOLD & SILVER

What can you say about a gold and silver mix? One word 'elegant.' Gold on its own conveys success, high-class and riches. Silver on the other hand oozes glamour, distinction and romance.

Bring the two together and you have the Wow factor. Our designer seamless floors are durable, low maintenance and can be non slip.

So walk on the 'wild side with Aaa Sexy Floors – floors of the future.

And remember, if it's not a **Sexy Floor** it's not an original.
