

Product / Services stories From AAA Sexy Floors Australia

18 APRIL 2007

At Aaa Sexy Floors our designer floors are not just coloured concrete, they are floors designed especially for you using only the best products that are exclusive to us. AAA Sexy Floors can estimate and specify any Commercial, Industrial and Domestic project within Australia.

ALUMINIUM FLOORS

Not just limited to foil and cans, aluminium gives you a completely different feel to your fit out. This ultramodern resin floor looks great in any location.

Because the floor is hand trowelled, the aluminium has depth and doesn't scream 'mirror' when you see it. Our most recent jobs have included aluminium against whites, mirrors, blacks and of course, other aluminium.

For durable, easy to maintain and environmentally friendly floors call us for our expert advice. Remember, if it's not a **Sexy floor** it's not an original.

CREEK BED

At Bundaberg Brewed Drinks Visitors Centre we created a floor that is distinctive to their business.

This resin floor was made to look like there is a creek bed flowing through the Centre.

Epoxy floors are seamless, hygienic, durable and most importantly safe. If you have a showroom, restaurant, retail space, warehouse or a home, we can design a unique floor just for you.

MARBLE LOOK FLOOR

It's widely known that the world's most recognizable sculptured masterpiece, Michelangelo's David, was made purely from marble.

Marble has become a cultural symbol of tradition and refined taste. The extremely varied and colourful patterns make it a favourite decorative material.

This resin floor may not be made of marble but it's certainly a classic and cost effective replication.
