Designer Epoxy Concrete Coatings

At Sexy Floors our epoxy floors are distinctive, affordable, environmentally friendly and meets Australian standards. The durability combined with non slip of R9 to R13, makes our concrete coating floors the ideal solution for retail, showrooms, warehouse, and restaurants; anywhere you need a tough hygienic floor, from 20 to 20,000 sqm.

After a decade of research and development seamless floors have been taken to the next exciting level to encompass 'designer epoxy'. This is especially true with our metallic range of aluminium, copper and bronze. Concrete is no longer being seen as a grey dusty surface; it is setting the scene as a clean, blank canvas for creativity and design.

All types and grades of concrete can be transformed into a designer floor. Old concrete can be self-levelled and rejuvenated to appear as freshly laid concrete.

The product has changed and the application has changed. Being seamless means not only is the floor easy to clean, it also means the dust and allergens have no where to hide. Sexy Floors designer epoxy floors are as easy to maintain as mopping a floor.

Resin floors have come along way and it is our application that sets us apart from the rest. It can be transformed every time into something that is individual and unique. So call us for specialist advice on all concrete coating floors.

New - North Queensland franchise servicing Rockhampton to Cairns, coming soon.

Remember if it's not a Sexy Floor, it's not an original design.
