

Product / Services stories From AAA Sexy Floors Australia

9 MAY 2007

AAA Sexy Floors epoxy designer floors are distinctive, affordable and environmentally friendly.

The durability combined with non slip, makes our floors the best in any situation. Commercial. Industrial. Domestic. AAA Sexy Floors can estimate and specify any project within Australia.

LIGHT POLISHED CONCRETE

Our light polished look goes very well with the modern and futuristic theme of the new DVD Lounge in Maroubra, NSW.

This seamless floor is very hardwearing, non slip, practical and environmentally friendly.

Remember, if it's not a Sexy Floor it's not an original.

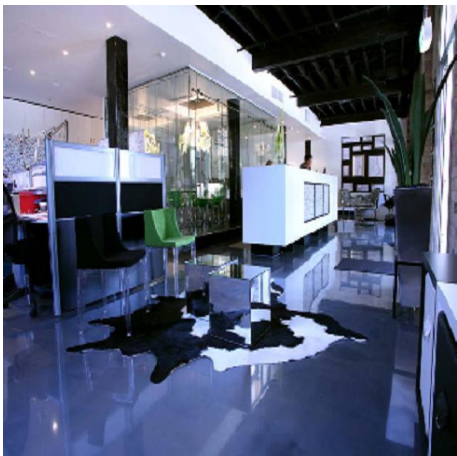

DARK COPPER

AAA Sexy Floors epoxy floors are distinctive, affordable and environmentally friendly.

Our designer metallic floors are a trademark feature of our business.

One of the advantages epoxy has over a lot of products on the market is the fact that the colour and style can be changed right in front of your eyes.

STYLE & CLASS

Clean lines and mirror images. Our seamless floor keeps them guessing. Is it black? Is it grey? Is it silver?

This translucent aluminium floor gives you a feeling of opulence and sophistication as you walk into this showroom.

When you add some down lights, the reflections sparkle at your feet as you walk through the room.
